### [1. 036: Testing the Efficacy of Combination HIV Prevention Strategies in Nonhuman Primates](#)

Release Date: 08-15-2012Open Date: 08-15-2012Due Date: 12-03-2012Close Date: 12-03-2012

Background: Although substantial progress has been made to identify new biomedical HIV prevention strategies, including topical and oral antiretroviral drug pre-exposure prophylaxis (PrEP) regimens and vaccines, they are not yet approved for general use. However, these preventions (or related derivatives) are likely to be implemented widely in upcoming years. The identification of HIV preventions ...

### [2. 025: Development of an Inactivated Rotavirus Vaccine for Use in Global Immunization](#)

Release Date: 08-15-2012Open Date: 08-15-2012Due Date: 12-03-2012Close Date: 12-03-2012

Background: The currently licensed oral rotavirus vaccines Rotarix™ and Rotateq™ are effective in reducing cases of severe diarrhea among children in high and middle income countries, but are significantly less effective in low income countries. In addition, both vaccines are associated with a low risk of diarrhea and intussusception among infants who receive the first dose of vaccine. To impr ...

### **[3. 026: Thermostable Dry Measles Vaccine Formulation for Sublingual Administration](#)**

Release Date: 08-15-2012Open Date: 08-15-2012Due Date: 12-03-2012Close Date: 12-03-2012

Background: Vaccines are one of the most powerful tools available for preventing disease. Measles vaccine has led to the elimination of endemic measles from the Western Hemisphere and a tremendous reduction in global mortality. However, the logistic difficulties inherent in vaccination by injection create barriers to high measles vaccine coverage. Vaccination by injection requires highly skilled v ...

### **[4. 002: Improved Methods for Collection, Preservation, and Transportation of Biological Specimens](#)**

Release Date: 08-15-2012Open Date: 08-15-2012Due Date: 12-03-2012Close Date: 12-03-2012

Background: CDC has both domestic and international laboratory programs that provide clinical specimen testing for the detection of known and emerging infections, chemical, or radiological agents that pose global health threats. Current methods for collection, storage, and transport of biological specimens are expensive and labor and material intensive. Clinical specimens are often collected by hi ...

### **[5. Biological and Chemical Technologies \(BC\)](#)**

Release Date: 08-30-2012Open Date: 11-03-2012Due Date: 12-03-2012Close Date: 12-03-2012

The Biological and Chemical Technologies (BC) topic addresses innovation in the life sciences and chemical areas including Biological Technologies, Biomedical Technologies, Environmental Technologies, and Chemical Technologies. Biological Technologies includes the subtopic areas of research tools, bioinstrumentation, biosensors, computational biology and bioinformatics, synthetic biology and metab ...

SBIR National Science Foundation

### **[6. Education Applications \(EA\)](#)**

Release Date: 08-30-2012Open Date: 11-03-2012Due Date: 12-03-2012Close Date: 12-03-2012

The Education Application (EA) topic addresses the challenges of advancing STEM (science, technology, engineering, and mathematics) education for all American students, to nurture innovation, and to ensure the long-term economic prosperity of the Nation. The urgency of this task is underscored by the need to ensure that the United States continues to excel in science, technology, and innovation in ...

## **[7. Electronics, Information and Communication Technologies \(EI\)](#)**

Release Date: 08-30-2012 Open Date: 11-03-2012 Due Date: 12-03-2012 Close Date: 12-03-2012

The NSF SBIR Program conceptualizes Electronics, Information and Communication Technologies in the form of a five-layer stack. Each layer of the stack builds upon the layer(s) below and supports the layer(s) above. At the foundation of this stack are devices. Devices (ED) are the building blocks for Components (EC) that are assembled into Systems (ES) built for Applications (IA) that are employed ...

## **[8. Nanotechnology, Advanced Materials and Manufacturing \(NM\)](#)**

Release Date: 08-30-2012 Open Date: 11-03-2012 Due Date: 12-03-2012 Close Date: 12-03-2012

The Nanotechnology, Advanced Materials and Manufacturing (NM) topic addresses innovations and development of new materials, devices, machines, structures and manufacturing processes for the advancement of the competitive nature and state of the art for U.S. industry. NM includes materials and manufacturing technologies such as electronic materials and processes, high-temperature materials, structu ...

SBIR National Science Foundation

## **[9. Biological Technologies](#)**

Release Date: 08-30-2012 Open Date: 11-03-2012 Due Date: 12-03-2012 Close Date: 12-03-2012

Biological and Chemical Technologies (BC) Biosensors Life Science Research Tools Bioinstrumentation Synthetic Biology and Metabolic Engineering Fermentation and Cell Culture Technologies Computational Biology and Bioinformatics ...

SBIR National Science Foundation

## **[10. Biomedical Technologies](#)**

Release Date: 08-30-2012 Open Date: 11-03-2012 Due Date: 12-03-2012 Close Date: 12-03-2012

Biological and Chemical Technologies (BC) Materials for Biomedical Applications Diagnostic Assays and Platforms Drug Delivery Tissue Engineering and Biomanufacturing Regenerative Medicine Biomedical Engineering Biomechanics Medical Imaging Technologies ...
